DETAILED ACTION

Allowable Subject Matter

1. An "Amendment" was received on March 14, 2005, in response to Office Action of January 11, 2005.
2. Claims 1-30 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. With respect to independent claims 1 and 16, prior art fails to disclose, in combination with other recited limitations of the claims, a method and apparatus for scanning electron microscope measurements which maintains a constant e-beam dose to the surface of a wafer being measured and thereby maintains a constant resist shrinkage. The apparatus provides a magnetic lens, a movable wafer holder to adjust the distance between a wafer and the magnetic lens, an image detector, means to determine the distance between the wafer and the magnetic lens, a retarding voltage applied to the wafer holder, means to adjust the retarding voltage, and means to focus the magnetic lens. The apparatus also provides feedback systems between the movable wafer holder and the means to determine the distance between the wafer and the magnetic lens, between the image detector and the means to adjust the retarding voltage, and between the image detector and means to focus the magnetic lens so that these adjustments can be made automatically. Maintaining a constant accelerating voltage for the electron beam regardless of charge on the wafer maintains constant resist shrinkage regardless of the amount of charge on the wafer.

Claims 2-15 and 17-30 are allowed by virtue of their dependencies on the independent claims 1 and 16.

Conclusion

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reasons for Allowance".
